

The New Standard In General Purpose Saw Blades

TiCo™ high-density carbide stays sharper longer for extended blade life.

Perma-SHIELD® permanent non-stick coating reduces blade drag for superior performance.

Unique anti-vibration design with special polymer filler dampens vibration for smoother cuts

Woodworkers have been searching for a superior general purpose blade ~ the one blade that truly does it all. The search is over. Freud® is proud to offer the discriminating woodworker the Premier Fusion Saw Blade. The patent-pending Premier Fusion blade is the most technologically advanced blade on the market. Radical new "Fusion" tooth design; superior high-density carbide; anti-vibration design and a patented non-stick coating all work in symphony to produce glass-smooth, chip-free cuts ~ top and bottom, every time.
